

A Natural Fit

Kodiak® Composite Deck and Rail

Just as a deck home extension is enhanced by the organic beauty of nature, the deck itself needs to respect the origins of its elements. And no one does it better than Kodiak from Deceuninck North America.

Our commitment to environmental sustainability is in everything we do. In fact, it's the driving principal behind the green thinking that has produced Kodiak composite decking and railing, one of the most economic and ecological alternatives to traditional decking materials. impacts of treated wood.

ECO-FRIENDLY

Kodiak has been designed and engineered to deliver more value and durability to the consumer without any of the negative ecological

We do it with a decidedly eco-friendly formula:

- Kodiak uses over 60% recycled wood fiber, making it one of the most eco-friendly composite decking materials on the market.
- Kodiak ships in reusable packaging, further easing the burdens on the environment.
- Kodiak is made to be 100% recyclable, allowing its positive environmental legacy to continue far into the future.

When you're thinking about home extensions, think Kodiak. It's a "nature-al" fit.
